

Texas Nameplate Co.

OUR NAMEPLATES
ARE GREEN™

QUALITY SINCE 1946

At Texas Nameplate, everything we do centers on delivering superior value to our customers. From multiple contact methods and web-enabled technology, to industry-leading response times, to competitive prices, every customer interaction is based on authenticity and reliability. To date, Texas Nameplate has a record of 98% on-time delivery, 99% defect-free, and .001% customer returns.

Since 1946, Texas Nameplate's dedication to manufacturing quality industrial nameplates, especially for harsh environments, has been well-known throughout the manufacturing community. So, it isn't surprising that over 60% of our customers have partnered with us for 15 years or more. We extend that same commitment internally: The average tenure of our employees is 12 years.

ISO CERTIFICATIONS

We are both ISO 9001:2008 and ISO 14001:2004 certified. Scan for more information or please visit us at; <http://www.nameplate.com/quality/>.

NEW STATE OF THE ART FACILITY

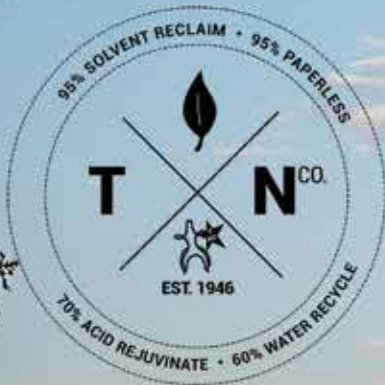

BUILT WITH THE ENVIRONMENT IN MIND

At Texas Nameplate, we care about our customers and the environment which is why we have gone through extreme efforts to make our nameplates green. We have come together as a whole company, person to person, and put a lot thought into the planning and designing process of the construction of our new state of the art facility. Planning for further future growth, we have purposefully purchased land beyond our facility's current square foot reach. Sitting on five and a half acres of land, and currently consists of two buildings.

Our main building houses our administration and manufacturing needs. This main facility is twice the size of our old building which will enable us to better serve our customers and grow with them.

Our new facility is strategically positioned for fifty percent expansion along with windows for natural sunlight to uplift moral and encourage our employees to see the beautiful outdoors of Texas. The second building is our chemical (H4) Building. The chemical building was designed and built to enable us to better serve our environment and provide a safer workplace for our employees. This chemical building sets 100 feet from our main facility and transfers chemicals and solvents by way of over 5000 feet of pipe and 20 pumps. This chemical building provides unprecedented environmental and safety conditions for all stakeholders.

A lot has changed since we opened Texas Nameplate Company in 1946, and we are excited and look forward to seeing what the future holds for us.
